DETAILED ACTION

Claim Rejections - 35 USC § 102

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

2. Claims 69-70 are rejected under 35 U.S.C. 102(b) as being anticipated by WO 95/01556 (hereafter “556”).

Regarding claim 69, “556” discloses a sensor assembly with features of the claimed invention including a pair of first strain sensors disposed on the first faces of a flexible pyramid shape body deforming upon the application of a force and generate corresponding output signal (see the abstract and figure 1). The reference also shows the use of related circuit board (see, for example figures 2 and 3).

Regarding claim 70, the strain sensors are resistive strain sensors.

Response to Amendment

3. Applicant's RCE, amendment and arguments filed 9/22/04 have been fully considered and the ejections of most of the claims are withdrawn in view of such amendment. However, the argument regarding the rejected claims 69-70 is not persuasive. Examiner believes that the recitation that the sensor assembly is *embedded* in a material is the missing feature of the applied cited prior art. Such recitation only appears in the preamble, which is not given substantial

Art Unit: 2855

patentable weight. It appears that the patentable feature is the fact that the sensor is *embedded* in a material, which is a structural limitation, and *not the martial*, itself. Because, not only the choice of material is a clear indication of a design expedient for a specific intended use, and therefore, not patentable, but also, there is nothing to prevent the arrangement of the cited art ("556") to have an elsomertic material as its test body. In fact the arrangement of the cited art is equally applicable to any material.

4. THIS ACTION IS MADE FINAL. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for response to this final action is set to expire THREE MONTHS from the date of this action. In the event a first response is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event will the statutory period for response expire later than SIX MONTHS from the date of this final action.
